About

Elk Antelope Gas Project Area Land Owners Association Inc.

Elk Antelope Gas Project Area Land Owners Association Inc., EAGPALA, is a registered legal entity representing the 11 clans in PRL-15. As a landowner association, it protects the rights of the PRL-15 Papua LNG landowners.

The association's specific goal is to raise awareness on the rights of landowners in Papua New Guinea. What sets our association apart from others in the industry are our umbrella companies, Jerilai Pujari Holdings Limited and Papua LNG Contract Management Limited, which have entered into joint venture partnerships with reputable companies to meet the specific needs required for the EPC contracts within the Papua LNG Project.

Confirmed as the principal landowners of the Elk/Antelope gas field as per the Ministerial Determination by Minister Kerenga Kua, we are now formally and legally recognised as legitimate landowning clans.

We aim to provide strong leadership on the ground to our umbrella companies, as well as to the Papua LNG Project, while at the same time, ensuring that our people derive maximum gains from economic and commercial opportunities created by the Papua LNG Project.

Vision & Mission

Vision

To be the catalyst for positive, generational change, leveraging the Papua LNG Project to uplift the 11 clans from poverty, fostering education, channeling improved health care, and creating a legacy of prosperity and sustainability for future generations.

By honouring traditional practices and integrating them with modern advancements, EAGPALA can foster a sense of pride and ownership among the clans, enabling them to carry forward this legacy of prosperity and sustainability for generations to come.

Mission

Empower the communities of PRL-15 through strategic participation in major EPC contracts, driving sustainable development, economic prosperity, and transformative change.

Collaboration between stakeholders, including local leaders, businesses, and government entities, will allow opportunity for growth and innovation.
